

Certificate :
Program Management (PgMP)[®]
Professional Certification

Duration :
4.5 Days (0.5 Days Mock Exam)

Course Delivery :
Classroom Based Instructor Led

Course Overview

The PgMP certification recognizes advanced experience, skill and performance in the oversight of multiple, related projects and their resources aligned with an organizational objective. PgMP certification holders oversee the success of a program – a way to group multiple, related projects to achieve benefits that may not be realized if the projects were managed in a stand-alone fashion.

As Project Managers advance in their careers, the experience they gain in managing multiple, related projects and making decisions that advance strategic and business objectives demonstrates this competence. As employers demand program managers who can support the strategic objectives of the organization, PgMP certification holders will gain a distinct advantage in employment and promotional opportunities over their peers.

Course will be based on Standard for Program Management (SPM) V3.0 and SPM V4.0

Course Objectives

- ⊙ Understanding of Program Management Concepts, Program Strategic Alignment, Program Benefits Management, Program Governance, Program Stakeholder Engagement and program Lifecycle.
