

Agile Champions

Delivery Method : Workshop

Code : AChamp

Duration : 1 Day

What you will learn

This highly interactive & experiential workshop provides an introduction and overview of Agile values and principles. We look at the underlying philosophy and motivation for this trend in product development, examine the core practices and techniques of Agile development and understand how they can be applied to the entire business. It also gives an understanding of the most fundamental functions of an Agile Champion including facilitating the Agile practices, fostering collaboration amongst team members and generally supporting a self-organised team. Facilitation is about leading by example and the Champion needs a deep understanding of how their attitudes and behaviors influence their teams as role models and mentors. The course is in the form of a blended session comprising of both concepts and a simulated Case Study.

A certificate from QTnT Singapore will be awarded to participants.

Audience - Senior executives, managers and leaders who want to understand what Agile practices mean for them and their organisations and understand the value of facilitation skills in collaborative work environments. In addition, they may wish to understand how to apply a variety of tools and techniques and the context in which they are useful, how to facilitate the various Agile work practices and the role of the Agile Champion and how it can help collaborative teams on their agile journey.

Pre requisite - This course is aimed at Senior managers and executives inside and outside of information technology groups in organisations. It does not teach any specific tool or technique but provides an introduction to the Agile philosophy and approach that will enable the participants to make informed decisions regarding practices that will be effective for their own organisations.
