

# Agile Essentials

Delivery Method : Classroom

Code : AEst

Duration : 2 Days

## What you will learn

The course covers the philosophy, values, principles and background of the Agile methodology. It explains the flow, the processes and the environment of an Agile project, giving participants an overall understanding of the Agile world and the tools and techniques used in delivering value. It presents a structure for defining value and ensuring the project delivers the right product at the right time for the right customer. The course is in the form of a blended session comprising of both concepts and a simulated Case Study where participants will walk through a brief of an Agile project.

A proctored exam will be conducted at the end of the course. A certificate from QTnT Singapore will be awarded to successful participants.

**Audience-** This is highly recommended for team members starting out in Agile projects or anyone looking for a good grounding in Agile management)

**Pre requisite** -There is no formal prerequisite for this certification)
