QUALITY TRAINING TECHNOLOGY

Agile Intensive

Delivery Method : Blended
Code : AInt
Duration : 2 Days

What you will learn

The course covers the background to and the driving forces for taking an Agile approach & understanding the core practices and philosophies behind a number of specific Agile methodologies. It helps confidently apply a number of tools and techniques from structuring and coordinating self-organising teams to ensuring continuous feedback across all layers of the organization, how to use Agile techniques to plan, track and monitor Agile projects, programs and portfolios, understand the importance of value-driven delivery and continuous customer and user feedback in increasing team effectiveness. It also helps apply a variety of Agile tools and techniques to provide a guidance and decision making framework for self-organising Agile teams to ensure their continuous alignment to organisational goals, philosophy, values, principles and background of the Agile methodology. The course is in the form of a blended session comprising of both concepts and a simulated Case Study where participants will walk through a simulated Agile project.

A proctored exam will be conducted at the end of the course. A certificate from QTnT Singapore will be awarded to successful participants.

Audience - This is highly recommended for team members starting out in Agile projects or anyone looking for a good grounding in Agile management)

Pre requisite - This course builds on your existing knowledge of both Agile and Project Management - you need to have a good understanding and experience in both to get the maximum benefit from attending this course. The QTnT Essentials Course would be useful in this regard)

Examination

❚ Multiple Choice
❚ 90 questions per exam
❚ One mark awarded for every right answer
❚ No negative marks for wrong answers
❚ 120 minutes duration
❚ Proctored exa
